Regional Comparison - Q3 2025

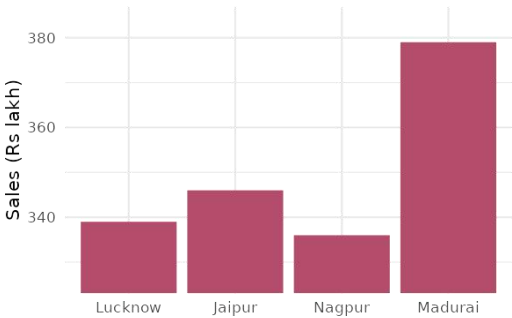

Chart 1

Market Share by Product (12 categories)

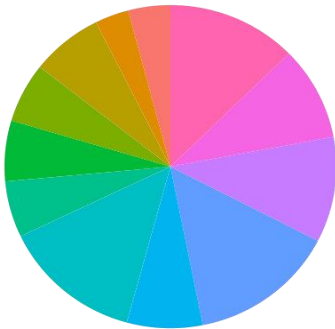

Chart 2

Coffee Consumption vs. Productivity Score

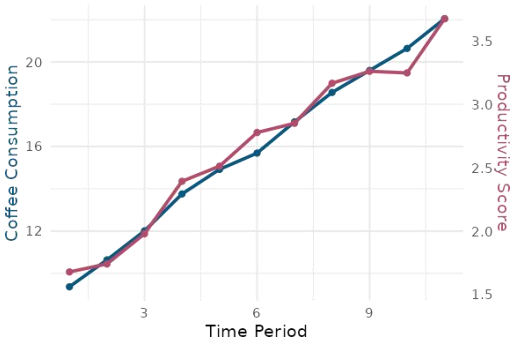

Chart 3

Age (years) vs. Monthly Spend (Rs)

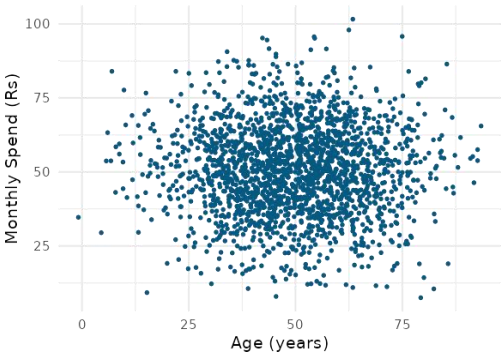

Chart 4

Decode the chart

chart 1 - Regional Comparison, Q3 2025

What is it trying to tell You?

chart 1 is a bar that compares the sales of four regions: Lucknow, Jaipur, Nagpur and Madurai during Q3 2025. Madurai has the highest sales at approximately ₹380 lakh while Nagpur has the lowest at around ₹336 lakh. Jaipur and Lucknow have sales of approximately ₹346 lakh and ₹339 lakh respectively.

Do you trust it? Why or why not?

Partly. The data comparison is understandable, but the Y-axis starts around ₹330 lakh instead of 0. This makes the differences between the bars look much larger than they actually are.

chart 2 - Market share by Product:

What is it trying to tell You?

It shows how the total market share is divided among 12 different products.

Do you trust it? Why or why not?

Not fully. The chart does not show product names, so it is percentages so it is difficult to know which product represents each slice.

Chart 3 - Coffee Consumption vs. Productivity Score

What is it trying to tell you

It shows that coffee consumption and Productivity Score both increase over time periods shown

Do you trust it? Why or why not

With Caution. Both lines increase, but the chart alone does not prove that higher coffee consumption causes higher Productivity. Also, it uses two different. More information would be needed to understand the exact relationship look stronger

Chart 4 - Age vs. Monthly spend

What is it trying to tell you?

It examines whether a person's age is related to their monthly spending

Do you trust it? Why or why not?

Mostly, but with Caution. The large number of Points gives useful information, but the points are widely scattered and there is no obvious strong relationship. More information would be needed to understand the exact Correlation.
