

Redesign the Misleading Colored Chart

R.No: 12 Reg. No: 192424277 Name: GUNA P

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

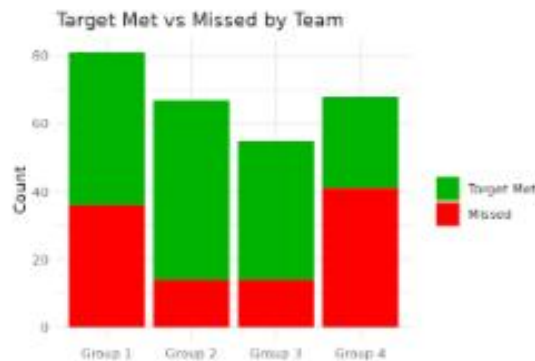

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

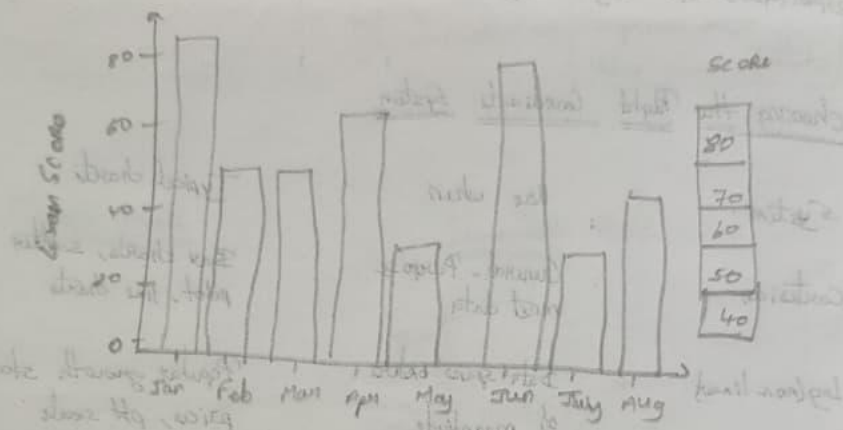

3. Propose a better color scheme (describe it in words):

3/10/21

Activity

Redesign the Misleading Colored chart

chart 1 - Exam Score by Month:

1) What is this chart trying to show?

The chart shows the exam scores from January to August. It helps compare the performance in each month. January has the highest score, while May has the lowest score.

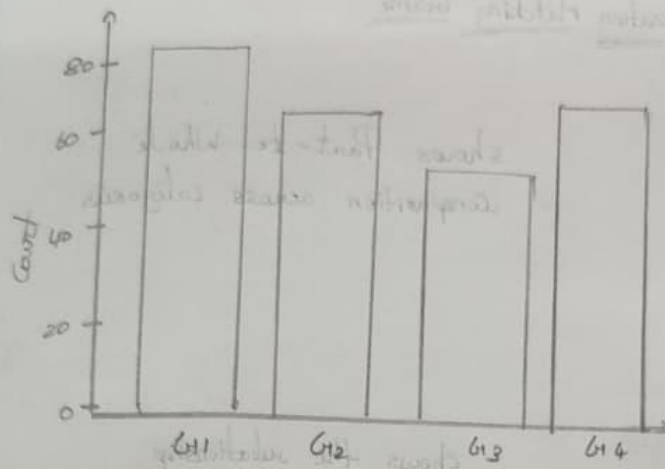

2) What's wrong with the color choice?

The chart uses many bright and different colors for the bars. This makes the chart look confusing because the colors do not represent different categories.

3) Propose a better color scheme

Use one consistent color for all months, such as blue, or use different shades of blue to show the values clearly.

Chart 2 - Target Met Vs Missed by Team:

2) What is this chart trying to show?

The chart compares the target met and targets missed by Group 1 to Group 4. It helps us understand the Performance of each group.

3) What's wrong with the color choice?

The chart uses bright and red, which strongly suggest Performance failure or danger, and the two colors may also be difficult for some viewers to distinguish. The bright colors can distract from the actual data.

3) Propose a better color scheme:

Use blue for Target met and light gray or orange for Missed. These colors will make the chart clearer and more professional. The same colors should be used consistently for all groups.
